

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

a-1
1. (Currently amended) A method for extracting additional information from an image, the method comprising the steps of:

- (a) obtaining a wire mesh and a texture model;
- (b) providing instructions for directing the wire mesh which in combination with the wire mesh and texture model forms an animated object; and
- (c) audibilizing ~~directing the animated object to deliver audibilized~~ information that further defines characteristics defining information contained within the image or content by directing the animated object to deliver the information.

2. (Original) The method as in claim 1 further comprising a database containing information which provides the audibilized information.

3. (Original) The method as in claim 1, wherein the animated object is either in the foreground or superimposed on the image.

4. (Original) The method as in claim 1, wherein step (c) includes selecting an object in the image for initializing the audibilization.
